

**TEMPERATURE TECHNOLOGY INC.**

## **Please Join Us in Congratulating Mike Berry 30 Years of Excellence in Service**

Mike Berry started his career as an electrician working for Alcon Electric. He worked his way up to journeyman electrician in 1983 and came to work for Temperature Technology, Inc. in 1986. Initially, Mike ran conduit for Tem Tech but soon picked up on the pneumatic controls for which he was running conduit. With his electrical knowledge and added temperature control knowledge, he quickly moved up to running projects for Tem Tech. Mike continued to grow with the advancements in temperature controls and is now proficient in pneumatic, pneumatic/ electric, electric, and electronic DDC temperature controls. Whether it is installing or programming the temperature controls, Mike has done it all and done it well! During Mike's thirty years with Tem Tech, he has been involved with countless projects in Western South Dakota, Eastern Wyoming, and Northwest Nebraska. Some of the more recent projects

have included Rapid Chevrolet, the VA in Hot Springs and the SD Army National Guard. There are very few projects that Tem Tech has completed that do not contain Mike's fingerprints. All contractors know that their project is in capable hands when he is on the job site, and that any issues will be resolved.

It was only natural for Mike to become the head of maintenance at Tem Tech because of his vast knowledge of all types of temperature controls. Mike is well capable of taking care of any customer's needs whether he has to pull out his pneumatic gauges or his computer. He is currently responsible for our temperature control maintenance contracts and service when needed.

Temperature Technology, Inc. has been blessed to have an exemplary employee like Mike for the last thirty years. The fact that we had to change our policy book to accommodate his years of service is a testament to his loyalty, work ethic, and abilities. We don't know if he has another thirty years left in him, but if he does, it will be Tem Tech's privilege to have him as part of our team.
