## West Plains Engineering Expands Power Division to Wyoming

**Casper, WY** – West Plains Engineering is pleased to announce the expansion of its Power Engineering Division to Casper, Wyo. The Power Division specializes in transmission and distribution system design, substations, SCADA and load management; and will join WPE's existing MEP engineers at 145 South Durbin, Suite 205.

Senior Electrical Engineer John Rickert will lead the division's effort in Casper with 25 years of experience in consulting and utility power engineering.

The expansion means WPE can now better support rural and municipal utilities in the Wyoming and Colorado service area, while continuing to partner with clients in North Dakota, South Dakota and Nebraska out of its Rapid City office.
