35 hours, PMI ® Certified  
19-23 September 2016; \$1,495  
<http://www.bhsu.edu/projectmanagement>

You will be introduced to important project management principles, along with critical techniques for preparing the application and passing the certification exam required to earn the PMP® or the CAPM® credential. You will spend a significant amount of time in each area of study – including the five processes and ten knowledge areas. You will spend time studying scheduling, developing scope, and Earned Value Management. You will also become familiar with the types of questions, how to answer questions with more than one correct answer, and how to manage your time during testing.

PMP®'s earn 20% more!
