

CTE Back to School

Construction Trades Workforce Connection of the Black Hills is reaching out to area Construction Trades Educators to see what we as an industry can do to help support them in building the next generation of craftsmen.

This past spring we visited the Hot Springs High School Construction Trades Classroom and talked with instructor Jobie Dryden and his class about the many job opportunities available in the trades and the pathways to get there. We invited them to share their classroom wish list with us.

If you would like to sponsor an item from their wish list, you can drop off the donation at the CIC office - 2771 Plant St Rapid City, SD 57702. Below is the link to their wish list.
