

WIC Week March 1-7 2026

Celebrate

Women in Construction

For WIC (Women In Construction) Week we wanted to show our support and encouragement for the next generation interested in the trades, so we shared lunch and visited with the girls in construction classes at Rapid City Central and Stevens High Schools.

We had a friendly competition to see who could drive the most 3" screws in a minute. Winner took home a Pink Cordless Drill and a tool bag to start their own tool collection. (Winning counts were 11 and 14).
